2014 deadline to cease discharge:	Support for 2014 deadline	Baykeeper*	219	Staff acknowledges that the 2014 schedule does not include allowances for significant delays in planning, financing, design, environmental evolutions, construction, and start up; however, it is a feasible schedule. The City has provided no evidence that the 2014 schedule s is not feasible. Latham and Watkins provides an alternate scenario based upon its expertise, but it appears to be a “worst case” schedule and staff does not agree that the worst case is inevitable. For example, staff is aware that significant planning and preliminary design work has been done by the City (see Stone 2004 and Questa 2003 and 2005), and that State Water Board funding opportunities have been initiated. * Bay Keeper: Accelerate deadline to 2012 for Civic Center, Malibu Colony, and Winter Canyon (page 219). **Heal the Bay: "...outlines a reasonable schedule..." (page 235). [Re Malibu Colony]..."A requirement to either tie into the sewer or install a disinfection system ...[within] 8 years would be acceptable...." (page 236).

Opposition based on anticipated financial hardship		City	131-133	Staff has not attempted to allocate costs among users – e.g. allocating costs among homeowners versus commercial and industrial users. Financing community services, including collection and treatment of wastewaters is typically by a community, and not at the state or federal level. Likewise, finding a fair way to allocate the costs within a community is typically decided by community leaders with input from their constituents. Nevertheless, the Board has been advocating on behalf of the community, to obtain financial assistance from the state. Staff has already encouraged the City apply for a subsidized loan from the Clean Water State Revolving Fund. Also, the Board may wish to encourage community leaders to make allowances or set more flexible payment terms for users facing financial hardship, such as seniors on fixed incomes and low income homeowners.
